### New Era Business Solution

## Turkish Chamber of Shipping Increased The Productivity with LOGO's New Solution j-guar!

As Turkey's pioneer occupational organization Turkish Chamber of Shipping preferred "j-guar" and its custom-engineered modules in order to entegrate all of their business processes.

Turkish Chamber of Shipping believes in the efficiency of using local software in terms of the legislation and employees, and uses "j-guar" product since January, 2012.

"Before j-guar, we were trying to operate our processes with several non-integrated solutions. We had an noticeable improvement on our business processes by providing all the units' operating integrated with j-guar. J-guar and its applications made great contributions to our business productivity."

### Why to Choose j-guar?

j-guar has a wide range of module options working in integration with each other and including all functions required by corporations such as finance, purchasing, production, project management, human resources, sales and distribution.

j-guar has multiple currency and language types and is fully compatible with legislation of all countries thanks to the legislative harmonization, and thereby it supports international operations.
